The directions said to use the scanning objective, which is the shortest one and use the coarse knob to bring the "e" into focus. It worked slowly and could finally see the letter. I was surprised to see that it was upside-down. I looked on the stage and I had put it there pointed the right way, but it seemed like the microscope reversed the image!

Story Lab: Microscopes and the Letter "E"

Short Answer: Animals and plants have been selectively bred for generations to produce certain desired phenotypes. This is an example of artificial selection. This supports the theory of evolution because it shows how organisms can change. Use the peppered moth example to explain Darwin's 5 points of evolution. 1.
