Air Suspension

Compressor

The air suspension compressor is the heart of an air suspension system, that's usually attached to the car frame and found under the hood. It draws in outside air, compresses it, and uses the compressed air to fill the air springs to "lift" the vehicle's chassis from the axle. It controls the pressurization and depressurization of the pneumatic system.

Air Suspension

Diagnosis & Fix

The component charged with carrying all that weight is the air suspension. Weighing in at just under 6,000 pounds, just keeping the Expedition off the ground is a monumental task. Add to that a few people and cargo and you are really asking a lot of your suspension to begin with. The OEM air suspension in your car supports all this
