Chart

The headline difference in the video modes is that the HERO3+ Black shoots 4K video (4096×2160 at 15fps). The highest resolution on the Silver is 1080p (at 60fps). If you're shooting mainly for sharing on the web, 1080p is often more than enough (much web "HD" video is at 720p).

The specifications of the GoPro HERO3 Silver Edition pretty much match the HERO2 on paper but there are some improvements to the lens that result to better video recording performance. The available video modes are the same for the most part with 1080p serving as the high-quality option which should look good on large displays.
