IT Essentials (Version 7.0) Chapter 8 Exam Answers - IT ...

In a SOHO environment, a wireless router connects to the ISP via a DSL or cable modem. The IP address between the wireless router and ISP site is typically assigned by the ISP through DHCP. This method facilitates the IP addressing management in that IP addresses for clients are dynamically assigned so that if a client is dropped, the assigned IP address can be easily reassigned to another client.

What is the reason that an ISP commonly assigns a DHCP ...
