Step 1 Draw a segment with an endpoint at vertex A so that the segment is perpendicular to line l and is bisected by line l . Label the other endpoint of the segment A' . Step 2 Repeat Step 1 at vertex B. Notice that C and C' are the same point because C is on the line of reflection. Step 3 Connect points A' , B' , and C' .

get more of the practice they need. Sample Self-Evaluation #2 During the first part of the lesson I felt insecure. I temporarily lost my focus because of the new circumstances and because many of the students arrived late. As a result, the lesson did not start well. It was choppy and disjointed. Once I got into the lesson, I felt more comfortable.

Draw a segment with an endpoint at vertex A so that the segment is perpendicular to line l and is bisected by line l . Label the other endpoint of the segment A' . Repeat the process with the other vertices of the figure. Connect the images of the vertices in the same order as the preimage to draw the image of the figure.

Students are instructed to describe the reflections that map triangles onto other triangles. This activity is designed to identify students' prior knowledge about reflecting objects on the coordinate plane. It leads into the lesson where students will use functions to describe reflections (G.CO.2).
