Fear of music "Noise and its relationship to music — and noise as music — is asuitably chaotic and mercurial subject with much hissing feedback. According to author Paul Hegarty in Noise/Music, A History (Continuum, 232 pages, \$22.95), noise is "defined by what it is not" and "a resistance, but also defined by what society resists."

Overview. Noise/Music looks at the phenomenon of noise in music, from experimental music of the early 20th century to the Japanese noise music and glitch electronica of today. It situates different musics in their cultural and historical context, and analyses them in terms of cultural aesthetics. Paul Hegarty argues that noise is a judgement about sound, that what was noise can become acceptable as music, and that in many ways the idea of noise is similar to the idea of the avant-garde.

If the dialectical funnels burrowed out by Hegarty—expectation and rejection, the expectation of rejection and the rejection of expectation, and so on ad infinitum—are not porous to the multiple, then there can be no listening to noise (and it could have no history). Paul Hegarty's *Noise/Music* will and should be widely read and offers much to be emulated. Its theoretical armature is highly complex and regularly supports brilliant analyses coupled with far-reaching critiques of many ...

Noise music is an old, very old human activity but it is finding a new vital energy in our modern world. There is no real difference between noise and music. Both have to be listened to to be heard and eventually appreciated in a way or another. If you don't listen you won't hear the thunder and you may miss the warning it may represent to us.
