Background Software has made the world a global village today.

Lab Manual

Hence, testing principle states that - Testing talks about the presence of defects and don't talk about the absence of defects. i.e. Software Testing reduces the probability of undiscovered defects remaining in the software but even if no defects are found, it is not a proof of correctness.

7 Principles of Software Testing: Learn with Examples

For automation, in test plan, create a new automated test and launch the tool and create the script and save it and you can run from the test lab the same way as you did for the manual test cases. The test cases are sorted in test plan tab or more precisely in the test director, lets say quality centers database. test director is now referred to as quality center.
