Definition of water-supply engineering. : a branch of civil engineering dealing with the development and maintenance of water supplies.

Water-supply Engineering | Definition of Water-supply ...

Water supply systems get water from a variety of locations after appropriate treatment, including groundwater (), surface water (lakes and rivers), and the sea through desalination. The water treatment steps include, in most cases, purification, disinfection through chlorination and sometimes fluoridation. Treated water then either flows by gravity or is pumped to reservoirs, which can be ...
